

### Relative Low Water Times

Approximate low water times at other locations may be easily calculated by adding the hours given in this list to the times of low water at Gt. Yarmouth Yacht Station listed in the main table below.

Acle	2½ hrs later	Oulton Broad	3 hrs later
Beccles	3 hrs later	Potter Heigham	3 hrs later
Brundall	3 hrs later	Reedham	1½ hrs later
Horning	3 hrs later	St Olaves	1½ hrs later
Loddon	2½ hrs later	Stalham	4 hrs later
Ludham Bridge	3 hrs later	Wroxham	3½ hrs later
Norwich	3½ hrs later		

PLEASE NOTE: (a) The times are 'clock times' and have been adjusted for BST. (b) The times stated are approximate, tides are affected by weather and wind conditions. (c) Cruising during darkness is forbidden. You must plan your journey so as to be moored 1 hour before sunset.

## 2018 Norfolk Broads Tide Table and Information

The Broads rivers are tidal, the tide rising and falling twice in every 25 hours approximately. Generally the outgoing tide (the "ebb") lasts longer than the incoming tide (the "flood"). The tidal effect is most noticeable near Gt. Yarmouth, where the Broads flow out into the sea, and here the tidal rise and fall can be up to 2 metres. Tidal streams near Gt. Yarmouth can run at around 4mph. As you go further up river the tides are less noticeable.

It saves time and fuel and makes less wash to go with the tide, not against it. At Gt. Yarmouth there are low bridges which may delay you if the tide is very high. The best time for passing through Gt. Yarmouth is within one hour before or after the low water times shown below: you will have best headroom under the bridges and your boat will be easier to manage. Slack water (when the current is still, at the change of tides) occurs about 1 hour after the times given.

## LOW WATER AT GREAT YARMOUTH YACHT STATION ADJUSTED FOR BRITISH SUMMER TIME
